INTERNSHIP FRONT-END DEVELOPER

Internal internship at the Municipality of Ksar Toulal. Together with a colleague, I designed and developed the front-end of the official municipal website using HTML, CSS, and JavaScript. The site supports four languages (Arabic, French, English, and Amazigh) through a dynamic multilingual structure using JSON, without relying on external frameworks such as Bootstrap.

- Initiated the development of the official website for the Municipality, which previously had no digital presence.
- Built the website using HTML, CSS, JS, JSON and responsive design principles.
- Continued working on the site after the official internship period, aiming to deliver a complete, accessible solution.
- Gained firsthand experience in public sector digital transformation and civic engagement.
