

SAMIR NASSIRI

IT Development Technician — Full-Stack & Desktop Applications

Bouskoura, Casablanca | +212 695 901 226 | samirnassiri67@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [Certificate](#)

PROFESSIONAL PROFILE

IT Development Technician with hands-on experience building both desktop and web applications for real businesses. Skilled in Python, PyQt5, JavaScript, React, Node.js/Express, SQL (MySQL/SQLite), REST API design, and Windows deployment (Nuitka). Delivered production-grade software independently and through internships — including PyQt5/SQLite ERP systems for cold-storage management and a full-stack car rental platform — covering database design, secure user/role management, document generation, and responsive, multilingual UI. Strong problem-solving skills and a practical, end-to-end approach from requirements gathering to deployment.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Python, React.js, Node.js / Express.js

Desktop Development: PyQt5, Nuitka (Windows .exe packaging)

Databases: MySQL, SQLite, database design

Web: HTML5, CSS3, Tailwind CSS, Bootstrap, REST APIs, responsive & multilingual UI

Tools: Git / GitHub, VS Code, XAMPP

PROFESSIONAL EXPERIENCE

Atlas Fruits Cooperative Meknes — Freelance Developer

June 2026

Designed and built a desktop management application for a cold-storage cooperative, working directly with the client to gather requirements. Built with Python, PyQt5, and SQLite, the system manages clients, contracts, products, and cold storage rooms, with real-time stock tracking and cash register monitoring. Delivered as a standalone Windows executable tailored to the client's workflow.

Frigo Slimani — Internship

April – May 2026

Designed and developed a secure desktop ERP for a cold-storage business using Python and PyQt5, with a SQLite database, role-based user permissions, and an operations/inventory management system. Built PDF document and report generation features with a strong focus on data reliability and application security. Packaged the application as a standalone Windows executable (Nuitka) for deployment on client workstations.

Municipality of Ksar Toulal — Web Development Internship

June – July 2025

Contributed to the first official website for the Municipality of Ksar Toulal: a responsive, multilingual platform built with HTML, CSS, JavaScript, and JSON without external frameworks. Continued contributing after the internship, further developing the platform and strengthening front-end and public-sector digital service skills.

ACADEMIC PROJECT

AutoLoc — Full-Stack Car Rental ERP (Final-Year Project) 2026

Built a full-stack car rental management platform with React (Vite), Node.js/Express, and MySQL, deployed via Vercel, Aiven, and Cloudinary.

EDUCATION

Specialized Technician (Bac+2) — TS in Computer Development, EPRIM, Meknes | 2024 – 2026

Scientific Baccalaureate | 2020
